## Brief Introduction

0C-7M3108 is a new generation industrial Power over Ethernet Managed switch with 8-Port 10/100/1000Base-TX and 1-Port 100/1000 Base-FX Fast SFP that provide stable and reliable Ethernet Transmission offered by Opticombine with high quality design and reliability. It is positioning in the broadband network intervention market, to offer and realize Ethernet data exchange, convergence and long-distance optical transmission with efficient bandwidth and reliable fiber optic network solutions for users. The industrial switch complies with various characteristics such as mini size, no fan, low power consumption, high reliability and stability, and easy to maintain.
With dual power input design, 0C-7M3108 can offer redundant mechanisms for critical applications that need always-on connections. It can also operate either at standard operating temperature range -40 to $75^{\circ} \mathrm{C}$. Housed in rugged DIN rail or wall mountable IP40 enclosures, these switches are perfect choices for harsh environments, such as industrial networking, intelligent transportation systems (ITS) and are also suitable for many military and utility market applications where environmental conditions exceed commercial product specifications.

Features
$>8 \times 10 / 100 / 1000$ Base-TX RJ45 ports, $1 \times 100 / 1000$ Base-FX Fast SFP ports
> Support Auto-MDIX, and full/half duplex self-negotiation mode
> Provide SC/FC/ST/LC interface fiber port, support single/dual fiber transmission
> Support 10K bytes giant frame, compatible with various extension protocol
> 8 K MAC address table
> Support IEEE802.3az energy efficient Ethernet technology
> Support IPv6 Protocol
> Electric 8KV surge protection, easy to use in outdoor environment
> Complete status indicator, working state at a glance
> Power input polarity protection design, no worry about wrong operation
> Metal case, no fan design
> Installation method: DIN trail/Wall mounting
